**Modeling method for subscriber usage in a usage based revenue system
for a communications network by defining a threshold and determining
excess usage above the threshold**

Inventor: RHODES N L ...

Abstract (Basic):

... A threshold value is defined and excess **usage** is determined by
summing all subscriber **usage** greater than the threshold and
subtracting the product of a sum of all subscriber hits greater than
the threshold value and the threshold value. The excess **usage**
component is used to analyze subscriber **usage** , specifically revenue
associated with **usage** above the threshold.

... An INDEPENDENT CLAIM is included for a data analysis system for
modeling subscriber **usage** .

...

... USE - ...

...Modeling of revenue streams from subscriber **usage** above a predefined
threshold...

...Provides real time, or near real time, modeling of excess **usage** and
the revenues obtained from that **usage** for financial modeling

ABSTRACT: There are only so many phone lines to go around, and with the proliferation of phone -based apparatuses, those lines are becoming overloaded. Similar to how asymmetrical DSL splits existing copper to gain bandwidth over phone lines, power line telephony aims to use existing copper utility lines to bring a last-mile solution straight to the home. One of the first to trial power line telecommunications was Nor. Web, a joint venture between Nortel Networks and United Utilities, a power provider in the UK.

TEXT: Technology aims to brine informatin to home via utility lines

There are only so many **phone** lines to go around, and with the proliferation of phonebased apparatuses, those lines are becoming overloaded. Similar to how asymmetrical DSL splits existing copper to gain bandwidth over **phone** lines, power line **telephony** aims to **use** existing copper utility lines to bring a last-mile solution straight to the home.

One of the first to trial power line **telecommunications** was Nor. **Web**, a joint venture between Nortel Networks and United Utilities, a power provider in the U...

... there were problems, including nearby light posts acting as aerials and broadcasting the radio waves (**Telephony** , Jan. 17, page 39).

Since then, U.K.- based Enikia and German-- based Oneline have...

... near the utility meter and contains a metering chip that allows utilities to monitor the **usage** of individual customers (see figure).

There also are other obstacles to power line technology, including...

...or signal loss.

Second, power lines were built to carry voltage--a lower frequency than **telecom** signals require. European utilities have added a highbandwidth communication node at the drop transformer to...

...Abstract: between outdoor and indoor communication. We address the problem of coordinating RF use of different **wireless communications** systems sharing the same RF spectrum in a layered configuration. We propose an arrangement that...

...No regularity requirements are imposed on the grid of cells or on the RF re- use pattern. We **analyze** the associated **statistical** quality management issues.

Abstract: **Telecommunication** services are deemed to be of four types: telegram, telex, **telephony** and teleinformation (data transmission). The procedure devised to programme the desired development of teleinformation services...

... by socio-economic factors of countries which would serve as potential models for Poland. The **statistical** data finally **utilized** for comparative **analysis** relate to 22 countries, especially during the period 1975-1982.

All eyes on IP traffic -- New apps can monitor Internet and intranet traffic, but do they deliver enough data to hold ISPs to their promises?

Larsen, Amy K

Data Communications , March 21, 1997 , v26 n4 p54-62, 8 Page(s)

ISSN: 0363-6399

Presents a buyers' guide to **Internet** analysis tools. Features a table comparing the collection source, LAN/WAN collection, protocols, **statistical** trending, response-time measurement, real-time alarms, unauthorized usage auditing, **usage** -based cost **analysis**, Web-based interface, and price of 17 products from 16 companies. Reports that not a single product can trace the path tha a packet takes across **Internet** routers because of the lack visibility into **ISP** and carrier router networks. Includes a sidebar, a diagram, and a photo. (dpm)
